Revision date 23.08.2022

Product description

Universal spray for removing uncured foam and polyurethane adhesives. The product is used to remove foam or polyurethane glue residues from the guns used for the assembly foam application, and to remove fresh unclogged foam stains and uncured polyurethane glue from the substrate and tools.

PZH Hygienic Certificate No:

B-BK-60211-0481/21

Method of application

Manual application:

Put the cap on the can nozzle. Apply product by spraying the nozzle of the can with foam in it, or spray surfaces spotted with fresh foam or polyurethane glue. Remove any residual product with dry cloth.

Use in the gun:

Unscrew the gun container; if there is still some foam inside, spray the nozzle with product to remove it; spray the gun adapter in the same way. Remove the cap from the product container, then screw the gun onto the container with product. Press the gun lever several times to remove any residual foam from the gun.

Transport and storage

Store in dry, well ventilated room, in tightly closed containers. Protect against moisture access and direct exposure to sunrays. Store away from heat sources, in the container originally packaged in a vertical position.

Avoid overheating containers above +40°C.

The products should be transported in tightly closed containers.

Recommended storage temperature [°C]

5 - 25

Storage life from manufacture date, if stored in recommended conditions and in original containers:

2 years

Application safety

Read carefully Safety Data Sheet of the product before use. Wear standard protective clothing when operating with the product.

***Notes**

Every time the user is obliged to check the product and auxiliary agents usefulness for his intentional use.

The user is obligated to have a valid technical data sheet and safety data sheet of the product, which is provided by the manufacturer during the sale and every time on the customer's request.

Prior to processing the user must carefully read aforementioned documentation and follow the rules of procedure for product use.
